

Engineered Contaminated Soils and Interaction of Soil Geomembranes: Proceedings of Sessions Sponsored by the Soil Properties Committee of the ASCE Geotechnical Engineering Division in Conjunction with the ASCE National Convention Held in Washington,

By Jay N. Meegoda, etc.

American Society of Civil Engineers. Hardback. Book Condition: new. BRAND NEW, Engineered Contaminated Soils and Interaction of Soil Geomembranes: Proceedings of Sessions Sponsored by the Soil Properties Committee of the ASCE Geotechnical Engineering Division in Conjunction with the ASCE National Convention Held in Washington, D.C, November 10-14, 1996, Jay N. Meegoda, etc., Due to liability issues, landfills are no longer considered the best method of waste disposal. Innovative, safe disposal methods for large quantities of contaminated soils and waste are sought by engineers. In urban or industrial areas with most of the contamination, it has become very attractive to engineer contaminated soils and waste by physical or chemical methods and reuse them as construction materials. This proceedings addresses the following: the creation of useful products from contaminated soils and waste; changes in soil or waste properties after processing; logistics of the operations; and the regulatory issues associated with such usage. While alternative methods of disposal are being utilized, civil engineers are still involved in the development of large containment systems and must continue to increase their knowledge of these systems. Solid-waste landfills are made of multi-layered soil and

Reviews

It in a single of my personal favorite ebook. Better then never, though i am quite late in start reading this one. I am effortlessly will get a satisfaction of reading a published ebook.

-- Ms. Lavada Krajcik

Comprehensive guideline for book lovers. It can be filled with knowledge and wisdom I realized this publication from my dad and i suggested this pdf to find out.
